

A Brief History of Metal and Heathenism

By: Ryan M. Chapman (Úlfar aff Jera Þjóð)

Disclaimer

When it comes the North East heathen community I am very much a community-oriented person and don't do much in the way of extensive research in texts tied to heathenism. I am purely going on my knowledge and experiences with the metal industry and the themes I found in the music that stand out compared to scholarly discourse. Music has always been tied to community and my presentation will focus on this aspect of it compared to diving into various texts that have influenced the bands discussed in this presentation. Thank You!
